

Join our team of experts for a day of valuable hands-on learning and doing, focusing on the latest stroke/ cardiac care and treatment, skills development/enhancement and interactive demonstrations.

Program Description

Designed for emergency medical services professionals at all levels. Featuring Crouse Hospital emergency services, cardiac care, neurology and obstetrical experts, the program will also include a panel discussion on hot topics in emergency medicine.

Program Objectives

This day-long training experience will include a review of current emergency medicine issues in cardiology, neurology and obstetrics, with presentations and case studies focusing on

- *induced hypothermia*
- *congestive heart failure*
- *stroke*
- *acute myocardial infarction*
- *obstetrics*

Following the program, participants will be able to identify evidence-based strategies and treatment options for pre-hospital care and integrate these strategies into their practice.
