M&O Area Report
2009-10 Planned Sustainability Activities
March, 2010

➤ Improve the design of the Building Services supply inventory control system to be more user friendly and to more readily track usage

➤ Based on historical records, build a Building Services cleaning chemical usage benchmark; goal is to reduce consumption
  • Continue from previous year

➤ Research and evaluate sources for green-seal chemicals used in the maintenance of HVAC systems; procure when practical

➤ Implement more rigorous preventive maintenance procedures to extend the life of M&O equipment and vehicles
