## Where is the Northern New York OverDrive®, Inc. Collection?

Go to: <http://libproxy.canton.edu:2048/OverDrive/sunycanton>, or click on the [OverDrive®, Inc. E-book Collection](#) link on the SUNY Canton Southworth Library website.

## Where are the OverDrive®, Inc. step-by-step instructions located?

Go here: Click on the red [Guided Tour](#) button on the right-hand side of the Northern NY OverDrive®, Inc. homepage.

## Where do I start?

What kind of device is it and what will I need for it?

**Kindle:** Needs no additional software. Ebooks are checked out from the OverDrive®, Inc. website, the patron is then directed to their Amazon account to transfer the library-loaned e-book through a wireless connection. Transferring via USB is also an option. OverDrive®, Inc. audiobooks are not compatible with any Kindle device.

**Regular E-readers:** All Nooks (Nook, Nook Color, Nook Tablet), Sony eReader, Kobo, and many more! For eBooks, you'll need Adobe Digital Editions installed on your Windows computer. Adobe Digital Editions can be found in the middle of the right-hand side of the Northern NY OverDrive®, Inc. homepage (under [Getting Started](#)).

**Mobile Devices:** Android smartphones and tablets, Apple products such as the iPhone, iPad, and iPod touch, and some other smartphones like Blackberry and Windows mobile devices: With these devices, users will go to their respective App Store, Android Marketplace, etc., and search for the OverDrive®, Inc. Media Console. This application will allow users to download ebooks and MP3 audiobooks right to their device.

**MP3 Players:** To listen to audiobooks on an MP3 player (that is not a mobile device), you will need to install the OverDrive®, Inc. Media Console software to your desktop or laptop. The link to access this software is located in the middle of the right-hand side of the Northern NY OverDrive®, Inc. homepage (under [Getting Started](#)). First, check your device's compatibility on the [OverDrive®, Inc. Compatible Devices Page](#) (under [Getting Started](#)) to determine what formats your device can access from our collection (MP3, WMA).
