## **Student Learning Outcomes Matrix Narrative:**

Your outcomes assessment plan must include, at minimum, two direct and two indirect measures of all student learning outcomes. Some measurement tools will be used to measure more than one student learning outcome. Each student learning outcomes must be measured at least once; including more and varied measures is a better practice and is encouraged. Below, narrate how you "close the loop" by describing any changes and improvements you made and plan to make as a result of your assessment activity:

- Address ALL SLOs those that meet or exceed expectations and those that do not.
- Explain why you have measures with insufficient data.
- Describe how this outcomes assessment data drives curricular and other decisions.
- Describe how have you improved/changed this year based on this data (close the loop).
