Mr. John Trimble  
President and CEO, C&S Companies  
Syracuse, NY

Mr. Trimble received an A.S. in Engineering Science from Alfred State University and a B.S. in Civil, Environmental and Structural Engineering from Clarkson University.

John has been with C&S since 1990 and is responsible for overseeing all of the company's design and construction projects and staff. He also executes the strategic and tactical operations plans for C&S, leads in optimizing business functions, and continues to diversify and grow the business nationally. Over the years, he has served C&S as a Vice President overseeing facilities design services and as president of the construction management company. Prior to that role, John managed the industrial facilities design group, worked as a general manager for the construction management group, project/operations manager for C&S's construction company and design engineer in the transportation design group.

A P.E. (Professional Engineer) and a LEED A.P. (Accredited Professional), Mr. Trimble is a member of the American Council of Engineering Companies (ACEC). In addition to managing projects ranging from small to $120 million in value, he has completed professional development programs at MIT and other special programs offered by ACEC.

Monday, March 21, 2016—3:30-4:30pm  
Miller Campus Center 218-220  
The presentation will be followed by a reception.

C&S, with an annual revenue of more than $100 million, plans, designs, constructs and maintains the built and natural environment. Founded in 1968 and employing more than 450+ professional and other staff, C&S serves local, state, and federal governments; industry and manufacturing; higher education and private businesses and is known nationwide for client-focused engineering, architecture, planning, environmental and construction services centered around facilities, aviation, surface transportation, site development, technology solutions and construction. The company has offices in New York, Ohio, Michigan, Arizona, California and Florida.
