COURSE OUTLINE

CONS 485 – Solid Waste Management

Prepared By: Adrienne C. Rygel, Ph.D.
A. **TITLE:** Solid Waste Management

B. **COURSE NUMBER:** CONS 485

C. **CREDIT HOURS:** 3

D. **WRITING INTENSIVE COURSE:** No

E. **COURSE LENGTH:** 15 Weeks

F. **SEMESTER(S) OFFERED:** Spring

G. **HOURS OF LECTURE, LABORATORY, RECITATION, TUTORIAL, ACTIVITY:**
   Lecture: 3 hours

H. **CATALOG DESCRIPTION:**
   This course will introduce students to the governing, management, science, and engineering that impacts solid waste. The role of the federal government in the management of municipal solid waste is discussed, in conjunction with state solid waste legislation. Different types of solid waste streams (e.g. household waste, construction and demolition waste) and their characteristics will be examined. Students learn how to plan municipal solid waste management programs. A significant portion of the course will be spent on solid waste landfill engineering and design (e.g. liner systems, covers, leachate collection and treatment systems, groundwater flow and monitoring, gas migration and collection). Construction and operational principles of landfills are discussed. Opportunities for reduction, reuse, and recycling of solid waste are discussed as one solid waste management technique.

I. **PRE-REQUISITES:**
   CONS 385 (Hydrology and Hydrogeology) and CONS 216 (Soils and Foundations); or permission from the instructor

J. **GOALS (STUDENT LEARNING OUTCOMES):**
   By the end of this course, the student will be able to:

<table>
<thead>
<tr>
<th>Course Objective</th>
<th>Institutional SLO</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Design landfill cover systems</td>
<td>2. Critical Thinking 3. Professional Competence</td>
</tr>
<tr>
<td>4. Inter/Intrapersonal Skills</td>
<td></td>
</tr>
<tr>
<td>-------------------------------</td>
<td></td>
</tr>
<tr>
<td>7. Prepare groundwater monitoring programs</td>
<td>1. Communication</td>
</tr>
<tr>
<td>8. Interpret solid waste regulations</td>
<td>2. Critical Thinking</td>
</tr>
<tr>
<td></td>
<td>3. Professional Competence</td>
</tr>
</tbody>
</table>

**K. TEXTS:**

**L. REFERENCES:**

**M. EQUIPMENT:**

None

**N. GRADING METHOD:**

A-F

**O. MEASUREMENT CRITERIA/METHODS:**

- Examinations,
- Homework assignments,
- In-class exercises,
- Quizzes

**P. DETAILED COURSE OUTLINE:**

I. Introduction
   II. Regulations Related to Solid Waste Management
      A. Federal Regulations
      B. New York State Regulations
   III. Composition of Solid Waste
   IV. Site-Selection for Solid Waste Facilities
   V. Principles of Decomposition in Landfills
   VI. Mass Balance Computational Procedures in Landfill Assessment
   VII. Water Balance Modeling For a Landfill
   VIII. Landfill Design
      A. Covers
      B. Liner Systems and Barriers
      C. Leachate Collection and Treatment Systems
D. Landfill Gas Migration, Collection, and Recovery
E. Groundwater Monitoring Systems
F. Design for Natural Attenuation

IX. Landfill Construction and Operation
   A. Cell Construction and Operation
   B. Cover Materials and Frequency of Application
   C. Prevention of Precipitation Run-On
   D. Operational Control Considerations
   E. Site Life Span
   F. Site Operations and Control (e.g. odor, noise)

X. Monitoring Programs
   A. Groundwater monitoring and regulation requirements
   B. Leachate monitoring and regulation requirements
   C. Gas monitoring and regulation requirements

XI. Reduction Opportunities
   A. Reuse
   B. Recycling
   C. Composting
