G. **COURSE DESCRIPTION**:

   The course will introduce students to emergency and disaster management training and exercise theory and doctrine. The class is presented in thirds, the first of which is an introduction and detailed information about the Homeland Security Exercise and Evaluation Program (HSEEP). Students will gain valuable skills in developing training and exercise objectives and develop detailed documentation for planning, conducting, and evaluating training and exercises. The second third of the course will allow students to actually create the required documentation to conduct different types of exercises. In the last third of the course, students will be divided into groups and actually participate in a discussion-based exercise involving a disaster scenario.
