A. **TITLE:** Engineering Economics

B. **COURSE NUMBER:** ECON 370

C. **CREDIT HOURS:** 3 credit hour(s) per week for 15 weeks

- ☒ One hour (50 minutes) of lecture per week
- □ Two to three hours of lab or clinical per week
- □ Two hours of recitation per week
- □ 40 hours of internship

D. **WRITING INTENSIVE COURSE:** Yes □ No ☒

E. **GER CATEGORY:** None: ☒ Yes: GER

*If course satisfies more than one:* GER

F. **SEMESTER(S) OFFERED:** Fall □ Spring ☒ Fall & Spring □

G. **COURSE DESCRIPTION:**

This course will expose students to economic theory through the use of mathematical modeling with a focus on economic decision making for engineers. Microeconomics topics will include supply and demand market analysis, and profitability. Macroeconomics topics will include the aggregate market, economic indicators, fiscal policy and monetary policy. The course will include segments of the engineering economic analysis covered in the Professional Engineering exam such as the application of different economic analysis methods utilized in evaluating the viability of a project and its alternatives, concepts of replacement decisions, capital-budgeting decisions, and project risk and uncertainty. Students will be exposed to specific issues of economic analysis of the private sector versus the public sector.

H. **PRE-REQUISITES:** None □ Yes ☒ If yes, list below:

MATH 121

**CO-REQUISITES:** None ☒ Yes □ If yes, list below:
I. **STUDENT LEARNING OUTCOMES:** *(see key below)*

By the end of this course, the student will be able to:

J. **APPLIED LEARNING COMPONENT:** Yes □ No □

If YES, select one or more of the following categories:

- Classroom/Lab
- Internship
- Clinical Placement
- Practicum
- Service Learning
- Community Service
- Civic Engagement
- Creative Works/Senior Project
- Research
- Entrepreneurship

P. **DETAILED COURSE OUTLINE:**

I. Microeconomics
   a. Opportunity Cost
   b. Supply and Demand

II. Macroeconomics
   a. Aggregate Demand and Supply
   b. Economic Indicators
   c. Fiscal Policy
   d. Monetary Policy

III. Engineering Economic Decisions
   a. Role of Engineers in Business
   b. Economic Decisions versus Design Decisions
   c. Large Scale Engineering Projects and Strategic Engineering Economic Decisions
IV. Interest Rate and Economic Equivalence
a. Interest: The Cost of Money
b. Money Market and Interest Rate
c. Economic Equivalence
d. Development of Formulas for Equivalence Calculation
e. Unconventional Equivalence Calculations

V. Understanding Money and Its Management
a. Nominal and Effective Interest Rates
b. Equivalence Calculations with Effective Interest Rates and with Continuous Payments
c. Changing Interest Rates
d. Debt Management
e. Investing in Financial Assets

VI. Present-Worth Analysis
a. Project Cash Flows
b. Initial Project Screening Methods
c. Variations of Present-Worth Analysis
d. Comparing Mutually Exclusive Alternatives

VII. Annual Equivalent-Worth Analysis
a. Positive Time Preference
b. Present and Future Values
c. Annual Equivalent-Worth Criterion
d. Capital Costs versus Operating Costs
e. Applying Annual-Worth
f. Analysis Life-Cycle Cost
g. Analysis Design Economics

VIII. Rate-of-Return Analysis
a. Rate of Return and Methods of Finding It
   1. Marginal Efficiency of Capital
b. Internal Rate-of-Return Criterion
c. Mutually Exclusive Alternatives

IX. Cost Concepts Relevant to Decision Making
a. General Cost Terms; Classifying Costs
b. Cost Classifications for Predicting Cost Behavior
c. Future Costs for Business Decisions
d. Estimating Profit from Production

X. Depreciation and Corporate Taxes
a. Asset Depreciation: Economic versus Accounting
b. Book and Tax Depreciation Methods (MACRS)
c. Depletion
d. Income Tax Rate to be Used in Economic Analysis
e. The Need for cash Flow in Engineering Economic Analysis

XI. Developing Project Cash Flows
a. Cost-Benefit Estimation for Engineering Projects
b. Developing Cash Flow Statements
XII. Project Risk and Uncertainty
a. Origins of Project Risk
b. Methods of Describing Project Risk: Sensitivity, Break-Even and Scenario Analysis

XIII. Special Topics in Engineering Economics
a. Replacement Decisions
b. Capital Budgeting Decisions
c. Economic Analysis in the Service Sector

Q. LABORATORY OUTLINE: None ☒ Yes ☐
