

Minor in Sustainability

Environmental Sustainability, the effort towards continuing economic, professional and national growth in a generational and environmentally responsible manner, is increasingly entwined with all professional fields and industries. Resource limitations, national/international demand and population growth will continue to assert its resulting implications on contemporary lifestyles and economy. Graduates who are well versed in sustainability concerns will be more competitive in the job market.

Minor Requirement				
Course Number	Course Name	Credits	Term	Grade
ESCI 101	Introduction to Environmental Science	Three (3)		
ESCI 102	Introduction to Environmental Science Lab	One (1)		
GMMD 421	Sustainability Design	Three (3)		

Select Four Electives				
ANTH 102	Introduction to Cultural Anthropology	Three (3)		
AREA 110	Intro to Alternative Energy	Three (3)
