WDI Child Care Scholarship Program

A crucial support for working families

WDI's Child Care Scholarship Program provides financial support for working families to help cover child care costs.

The average cost of child care for a family with two children is over $30,000 per year, forcing families to make hard economic decisions.

When families spend less on child care, they can better afford housing and transportation, pay student loans and other bills, and make healthier choices for increased nutrition for everyone in the household.
