

2025 Full Calendar Year Course Assessment Plans:

Below, you'll find the courses to be assessed in 2025 for ISLO #5: Industry, Professional, Discipline-Specific Knowledge and Skills. The courses listed were identified in program assessment maps derived from Taskstream as the competency or mastery checkpoints for this ISLO.

If the courses listed—beginning on page two—are taught only in the spring, all sections should be assessed in the spring. If the courses are taught only in the fall, all sections should be assessed in the fall.

Because ISLO #5 deals with industry, professional, and discipline-specific knowledge and skills, there are no AACU Value Rubric requirements. Rubrics are still required, but are developed at the discretion of the faculty serving within the program.

Program Directors and Curriculum Coordinators: please notify your faculty of their course assessment obligations.

Courses Not Listed On Subsequent Pages:

For all courses not listed on the subsequent pages, faculty are asked to assess one course objective aligned to:

ISLO 5: Industry, Professional, Discipline-Specific Knowledge and Skills

General Timeline for Each Semester:

Week 5: All measures should be entered

Findings Entry: Due by the end of the week following final grade entry deadline.
