Anikko Serrano '24

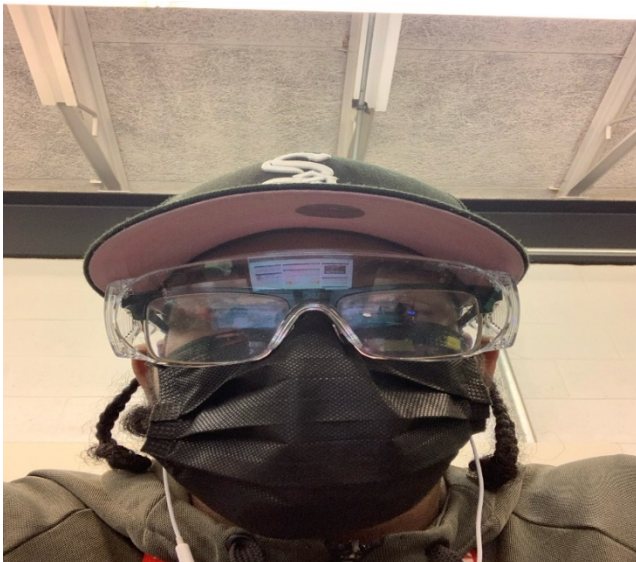

Bronx, NY

My name is Anikko Serrano, but I usually go by Nikko. I am in the Electrical Engineering Technology B.Tech. program with a minor in mathematics. I am set to graduate from SUNY Canton in 2024. Like the Jump Start Program, I'm in the EOP program, which similarly gave me a head start before my first year. SUNY Canton was a fantastic choice for me because, while being cost-effective, it is also one of the top engineering institutions in New York State. SUNY Canton has a wide variety of career and personal services open to all students, many of which I didn't know about my first year. All of the staff, the professors, and even I will ensure we can provide you with the best guidance.

Being from a city as hectic as New York, SUNY Canton's beautiful campus and peaceful aura provided me with a calmness I'd never felt before. Going to SUNY Canton has allowed me to better myself and has provided me with the amazing opportunity of being a Jump Start Mentor for the first time. Jump Start is one of the countless opportunities SUNY Canton provides to students.

The opportunity to mentor the incoming students is one that I will cherish. The Jump Start program provides me with a relevant and positive experience while allowing me to make the incoming students' time here all the better. My goal for this summer is to provide students with the appropriate guidance that will ultimately grow their self-confidence and show students it is okay to seek help.

**GREAT MAJORS,
GREAT CAREERS.**
