Definitions of Applied Learning Components

Civic Engagement (CIVE): A teaching and learning focus on educating students as citizens. Classes or programs include meaningful civic education and activities for social good. Classes and projects have components of reflection and engagement.

Clinical Placement (CLIN): Students rotate through a variety of health care agencies with faculty supervision focusing on the health care field process, with individual patients or groups reflecting diverse settings, across the lifespan. Emphasis is on mastering theoretical concepts, improving skill competency, and developing clinical reasoning skills with a focus on evidence-based practice.

Classroom/lab (CLSR)*: Applied or experiential learning activity that takes place within the scheduled classroom time (i.e. presentations/projects/case studies/hands on activities) or an applied learning experience as a separately scheduled laboratory section to a course.

Community Service (COMS): Volunteerism and community service performed by students for community benefit. This service can be, but is not necessarily integrated with a particular program of study. This may include structured projects (days of service), smaller group projects, fund-raising events, or individual volunteerism, which is acknowledged by the campus.

Creative Works/Senior Project (CWSP): A capstone, senior project, performance, or other creative work that occurs as a culminating experience for a student in an accredited class or program.

Entrepreneurship (program, class, project) (ENTP): Students in an entrepreneurship program develop a broad-based entrepreneurial skill relevant to any organization – start-up, established, and for and not-for-profit – in an industry. Entrepreneurship involves consistently thinking and acting in ways designed to uncover new opportunities that are then applied to provide value

Internship – Approved Applied Learning (INT): An Internship section that is approved as Applied Learning (follows the criteria in Appendix AB.)

Practicum – Non-Clinical Placement (PRAC): A period of practical experience undertaken in academic, professional or community settings/agencies/organizations as part of an academic course. This approach is grounded in application and practice of theoretical/technical concepts/skills and cultural competency relevant to the course or to a profession.

Research (RSCH): Mentored, self-directed work that enables students to make an original, intellectual, or creative contribution to the discipline by exploring an issue of interest to them and communicating the results to others. The projects involve inquiry, design, investigation, discovery, and application.

Service-Learning (SERV): A teaching and learning strategy that integrates meaningful community service with instruction and reflection to enrich the learning experience, teach civic responsibility, and strengthen communities. Students are not paid for service learning but section is credit bearing.
