Comic books and comic strips reflect issues the public is thinking about or concerned with. They are a surprisingly good way of gauging how the public historically viewed issues related to race and gender. Racism and sexism were common in popular media from the 1940's to the 1960's, and still can be found in today's comics. At the same time, there were also a few comics from this period that treated issues of race and gender in a sensitive and progressive way. This talk will examine both phenomena, showing multiple examples of sexism in comics.
