**Dunlap, Illinois**

My name is Andrew Fitch, and I am a senior studying a B.T. in Mechanical Engineering Technology with a Math Minor. SUNY Canton was the perfect choice because they have everything I wanted. The professors are here to help you succeed and make sure you're doing your best. I love the beautiful campus, and all the programs are hands-on and prepare you the work force. I received the Outstanding Graduate Award for 2019 graduates in Associate Degree programs. Going to SUNY Canton has given me many opportunities, and

I am currently a student ambassador, resident assistant and member of the Men's Basketball Team at SUNY Canton. I enjoy being able to meet new people and show them the wonderful things that this school offers. I have been given many opportunities to set myself up for a successful future. Playing basketball is the best decision I made, helping me to manage my time more efficiently, as well as having fantastic support from the athletic department. Athletically, I have played for Team USA in Brazil and have recorded 170 total career blocks, putting me 1st in Division III in blocks my sophomore year.

**GREAT MAJORS,  
GREAT CAREERS.**
