

My name is Angel Osoria. My hometown is Yonkers, New York. I'm currently in the Automotive Technology A.S. program. I received my bachelor's degree in liberal arts in May 2023. I chose SUNY Canton because of the layout of the campus, the variety of degree programs, and the many opportunities it offers to both new and returning students—whether job- or school-related. I really struggled during my first semester, but with the right support and connections, I got back on track. In fact, I now have a 3.8 GPA and am continuing my education by pursuing another degree.

If you're looking for a small, but fun campus with lots of great aspects, SUNY Canton is a solid choice. Some of my personal favorites include the forest trails, the gaming arena (whether you're playing solo or with others), and the events and clubs, especially the gaming club. We also have a gym, and I enjoy working when I can. I like staying busy and keeping to myself. I've found my place and can truly call this campus my second home. I love long walks on the beach and driving, whether it's racing on a track or just cruising. I also enjoy fishing on campus. While the bites can be few, when they come, it's a great catch! We have pike, walleye, bass, carp, sunfish, and more in the campus waters.

Overall, I can confidently say SUNY Canton has helped me come out of my shell and showed me that there are more opportunities out there. You just have to go and find them. A quote from my mother that stays with me to this day is: "Don't waste your time wondering why you didn't take the chance or opportunity...just do it."
