

Brigit Tejada '22

Manhattan, New York

My name is Brigit Tejada, and I am currently a senior in the B.S Veterinary Technology program. I'm a student ambassador at SUNY Canton, as well as an EMS (Emergency Medical Service) first responder, an active member of the Veterinary Technology Association and Outdoor Adventure Club. What I love most about SUNY Canton is its hands on curriculum, especially in the Veterinary Technology program. Each lab gives students the opportunity to handle and learn about different kinds of animals, such as companion, farm, exotic, and laboratory animals. Our program provides educational opportunities to students passionate and interested in pursuing a career in the animal care fields. Aside from our outstanding curriculum, SUNY Canton is truly a home away from home. My friends have become my family, and my professors have guided and ensured that I am doing my outmost best! Everyone here has helped me thrive into the person I am today and who I am becoming.

A small campus is perfect for me. Almost all the academic buildings are located near our plaza, giving students enough time to travel between classes at a reasonable pace. Being a small school you pretty much know everyone so you could never truly be alone.

As a student ambassador, I give tours for prospective students. I enjoy meeting new faces and sharing with others more about my campus. SUNY Canton is the school for me, and I hope it is for you.

**GREAT MAJORS,
GREAT CAREERS.**
