Charliann Friedman '22

Burnt Hills, New York

My name is Charliann Friedman, and I am a senior in the Veterinary Science Technology Bachelors program. I am also getting my minor in Applied Psychology. I decided to transfer to SUNY Canton after my first year of college because I wanted to learn specifically about Veterinary Medicine. My confidence in Veterinary care has grown immensely since participating in laboratory classes and internships at animal shelters. Since coming to SUNY Canton, I have felt very at home and supported. Outside of being a Student Ambassador, I am a Resident Assistant in Mohawk Hall, and I can support students while they live away from home. Since transferring to SUNY Canton, I have been able to make a difference in many students lives, and it has been an extremely fulfilling experience. Aside from receiving a wonderful education from Licensed Veterinarians and Licensed Veterinary Technologists, the personal growth I have undertaken at SUNY Canton has been an experience I never knew I could have while being away at college. In my free time, I enjoy playing instruments like guitar, ukulele and I love to sing. I am also a white-water rafting guide and enjoy spending time outdoors on rivers or lakes (or any natural body of water for that matter). This is my second semester as a student ambassador, and I am very grateful to get the chance to meet new people and to help them fall in love with SUNY Canton like I did.

**GREAT MAJORS,  
GREAT CAREERS.**
