**Dale Harris `21**

**Dundee, New York**

My name is Dale Robert Harris, and I am a senior at SUNY Canton. I'm currently in the Civil and Environmental Engineering Technology program. Before I came to SUNY Canton, I attended SUNY Delhi for 2 years in their Residential Construction Associate Program and graduated in May 2017. I chose to transfer to SUNY Canton because I wanted to go further into the residential/commercial construction industry, and civil engineering was the way to go. Every class that I have taken so far has been very informative and hands on, and I have enjoyed every minute of those classes! I have met and made a lot of great friends, as well as many wonderful professors that you begin to know personally when in class, as well as out of class. I am currently a member of the ASCE Student Chapter Organization, and am also the Vice President of the Bridge Team, where we design and build a small scale steel bridge and compete every year at regional competitions and then nationals if we make it. I always love to go to activities that SUNY Canton organizes, such as grocery bingo, movie night, stress free bingo, etc.

I am a first year Student Ambassador at SUNY Canton. I have met a lot of fantastic people that I am glad to call my coworkers and friends. I have learned a lot of new things about the campus and am currently learning more. There is a lot to know! When I don't have class or work to do, I enjoy hanging out with my friends and go to the nearby communities, from going to the movie theater right in downtown Canton to going to the bowling alley in Potsdam just less than 30 minutes from Canton.

**GREAT MAJORS,  
GREAT CAREERS.**
