

Hannah McGregor '24

Cohocton, New York

My name is Hannah McGregor, and I am a sophomore in the Health and Fitness Promotion program here at SUNY Canton. I chose SUNY Canton because I wanted to be in a new environment and to start building my own path in life away from home. When making my college decision, I graduated from high school a year early and wanted to be sure to find an environment that I could thrive in. The program is great, in that it offers several different tracks to choose from. I am currently in the science track, which allows me to focus on classes that will help prepare me to further my education. I am planning to transfer into the Nursing program in the fall. I am also a member of SUNY Canton's EMS squad, serving as the Vice President, as I love helping people. I am a general member of the Springwater-Wayland EMS squad as well. I recently became a student ambassador, providing campus tours and assistance to prospective students and their families. In my free time, I enjoy both traveling and knitting. I am also actively involved in community service, having participated in clothing drives and teaching children how to roller skate.

**GREAT MAJORS,
GREAT CAREERS.**
