

Heaven Suarez '29 Bronx, NY

I chose SUNY Canton because it gives me the best opportunity on learning how to code and program video games, as it is something I've always aspired to do as a lover of video games. So far, my favorite classes have been the game design classes, as it has shown me a deeper dive into the making of video games I haven't known in a way before. I was quickly able to make friends on campus within a week of being there, which can show you how friendly the students are around on campus and are excited to meet new people! There are so many clubs here at SUNY Canton, and I love how diverse it makes the campus. Going into SUNY Canton, being from the city, I thought I was going to be one of the very few from the city, but turns out there are so many students I've found out are from the city so that was really cool for me to see how many people from the city go here, as I feel more included. The events here are so much fun to either watch or take part of like the grocery bingo night or like karaoke night. There is just so much to do on campus, which is so cool to see. One of my favorite places in town is definitely the movie theater, as every Monday they have the student discount, which lets you see any movie for just \$5.00. So far, I've been working at the Ready Center as a work-study student, which has been pretty cool to work at, and recently I started to work as a student ambassador.

**GREAT MAJORS,
GREAT CAREERS.**
