# Kyle Meagher `23

Westmoreland, New York

My name is Kyle Meagher, and I am a senior in the cybersecurity program. I am also pursuing a minor in psychology. I chose to come to SUNY Canton because they recently renovated many of their computer labs and their technology degrees are always evolving, so I knew I would be learning on the latest and greatest technology. The professors are also learning everything they can about the field to stay up to date and teach their students about what is currently happening in the cybersecurity world. These classes are hands on and allow students to learn for themselves and figure out solutions to problems, rather than simply lecture and tell students the answer. Additionally, I am also a part of the outdoor adventure club, as well as on an Esports team. The outdoor adventure club allows me to explore many of the natures trails and paths around Canton with my classmates and gain a better appreciation for the world we live in. Esports has also connected me with people with similar interests to my own and allowed me to find people to share my passion with.

This will be my second year as a student ambassador, giving me the opportunity to share my experiences with potential students and show them some of what SUNY Canton has to offer. I love getting to know other students and learn more about them and why they chose to come here. When I do find time away from class and work, I enjoy working and learning more about technology and playing video games. I also love to work out here on campus and utilize the trails to go for a run.

GREAT MAJORS, GREAT CAREERS.
