

Muhammad Shabbir `23

Kingston, NY

My name is Muhammad Shabbir, and I am a senior in the Civil and Environmental Engineering program. I chose to come to SUNY Canton based on its dedication to the future of technology and how SUNY Canton helps students with hands-on experience and communication skills. As a student at SUNY Canton, I have given a lot of opportunities to gain leadership skills. I am a member of the Student Government Association and the College Activities Board. I am also a senator for the Society of Women Engineers and a College Academic Committee member.

This is my first semester as a student ambassador. I think it was a good decision to come to SUNY Canton. I love being here, meeting different people, and learning new things each day. In my free time, I love to spend time on the beach and go hiking.

GREAT MAJORS,
GREAT CAREERS.
