

Dear DL sites,

In response to recommendations from our Dean, UB, Erie County and NYS, we are making necessary changes to a number of events. Regarding the Wednesday night lecture series, we plan to proceed with most of the schedule as planned, with a few exceptions:

- Faculty will present their program without a live audience in Buffalo
- We are only offering online participation, with self-study credit from our site
- The **April 29 program is completely cancelled** as the speaker was to travel from NYC and present several consecutive programs in Buffalo – all have been cancelled
- The **May 6 program featuring Caryn Tierney has been postponed to June 17** and the title has been changed to: From Risk to Results: Periodontal Instrumentation For the Advanced Practitioner

It will be up to each of you and your organization to determine whether or not to proceed with the programs at your site. Please let us know how you plan to proceed (we need to clearly communicate CE opportunities to our dental professionals.) If you elect to cancel the meetings at your site, please notify and refund all registrants and please inform them of the online self-study option. They can call us (716) 829-2320 or register directly online on our registration [website](#).

It is likely all of you are experiencing similar actions due to this unprecedented event. We understand, and like everyone, hope the public will heed the warnings and the spread of this virus can be stopped.

If you have any questions and/or suggestions please do not hesitate to contact us.

Thank you and stay safe,  
Annamarie & Renee
