

Agricultural Technician

While many of the jobs available in the agricultural industry are on farms in St. Lawrence County, employment opportunities are available in other businesses as well. Other businesses include equipment sales, feed production and distribution, supply houses, veterinary offices and animal care, and agricultural financial institutions, to name a few. There is a spot in the agricultural industry for you!

“Today’s Agriculture is a fast-paced, high tech industry.”

Farms have evolved more than you may think. Today’s dairy farm is highly technical in nature. Computers control the milking operation. They constantly monitor every cow, determining the amount and formula of the feed that they receive. Cows health statistics are constantly monitored. High-tech equipment is used in field preparation, planting, and harvesting. Today’s farm has staff that operates in all of these areas and more. Join this exciting industry and embark on a lifelong career!

Seating is limited.

Career Ready Education and Success Training

Unemployed? Get a Job... Keep a Job!

There are many jobs available in the Agricultural Industry within St. Lawrence County. Many employers are looking to fill job vacancies. The problem is employers need people that know how to be productive and successful employees.

These employers have the ability to train new employees in the technical aspect of the job, however, they need employees with outstanding soft skills. What are soft skills? Punctuality, good verbal and written communication, dedication, reliability, being a team player, ability to resolve conflicts appropriately, and problem solving skills.

SUNY Canton CREST's Ag. Tech. Work Readiness Program, in partnership with St. Lawrence County One-Stop Career Center, will teach you these skills and, arrange interviews for a paid internship, and, if you are successful, you will end up with permanent employment.
