Andrew Fitch '19 & '21

Peoria, Illinois

My name is Andrew Fitch, and I graduated in May 2021 with a B.Tech. in Mechanical Engineering Technology and Minors in Mathematics and Applied Physics. SUNY Canton was the perfect choice because they had everything I wanted. The professors (including me) are here to help you succeed and make sure you're doing your best. I love the beautiful campus, and I like that all the undergraduate programs are hands-on and prepare you for the workforce.

Attending SUNY Canton has given me many opportunities and experiences that have changed my life. I received the Outstanding Graduate Award for 2019 graduates in Associate Degrees and the SUNY Chancellor's Award for Student Excellence for 2021 graduates in Baccalaureate Degrees, two prestigious awards. I also hold 4 records for the Men's Basketball team! This summer will mark my third year helping with Jump Start, and I am as excited as ever to meet the students and help them get to know Canton and be prepared for their college career.

The opportunity to teach the students this summer about what college is like and share my experiences is one that I will not forget. I have experience across the campus, working as a Student Ambassador, a Tutor, and adjunct, and a Resident Assistant, while playing on the Men's Basketball team. My hope is that each student is given an equal or greater opportunity to succeed at SUNY Canton, just as I have been able to.
