

Paul Todd '13, '14 & '21

Brooklyn, New York

SUNY Canton has been my home for over a decade. I started out as a student in the Alternative and Renewable Energy Systems program in 2009 and graduated in 2013. I enrolled in the Electrical Construction and Maintenance certificate program immediately afterwards and graduated in 2014. I took a six-month hiatus while working for an electrical construction company, but SUNY Canton called me home in 2015. I am one class shy of graduating with my Mechanical Engineering Technology degree from, you guessed it! SUNY Canton! I served as the Engineering Tutoring Lab Coordinator for three years, then moved into a full-time program coordinator and lecturer position for the HVAC Trades program in the fall of 2018. I have always loved teaching. There's something special about providing a space and watching students thrive in their academics and moving closer to their established goals. Jump Start is one of my favorite SUNY Canton programs. We get to assist students in laying the foundation for their continued success both in and out of the academic setting. What could be better as an instructor?

Your Jump Start Math  
Instructor is:

When I'm not working, I enjoy spending time with my wife, Laura, and our four-legged children, Ziggy, Toby, and Smitty. Laura and I are in the process of completing the Adirondack fire tower challenge, so I'm usually in the heart of the mountains in my free time. I am looking forward to meeting the next batch of students this summer, and I wish you the best of luck in your collegiate goals.

**Alternative & Renewable Energy Systems**  
SUNY Canton, BT

**Electrical Construction & Maintenance**  
SUNY Canton, Cert.

**Mechanical Engineering Technology**  
SUNY Canton, BT

**GREAT MAJORS,  
GREAT CAREERS.**
