

The Pet Wing

Member Contract

As a resident of the Pet Wing Community, I agree to the following terms:

The Pet Wing Community is a living unit that is focused on building a family atmosphere among residents. In order to accomplish this goal, residents will be allowed to bring pets to reside in the community. Additionally, members of the community will be encouraged to take responsibility for establishing behavior standards for all community residents through the Pet Wing Review Board and becoming productive members of the campus community.

1. I will actively participate in promoting and developing a strong sense of community among the Pet Wing Residents
2. I will participate in social and educational activities for my living area with the help of the Resident Assistants.
3. I will be a role model for others in the building; particularly through participation in programs and positive modeling in the care and respect for animals. I understand that the Pet Wing is **INTENSIVE ALOCHOL FREE** and I will demonstrate responsible behavior by living within the established guidelines of the Student Code of Conduct. I understand that if I am found consuming or to be in possession of alcohol, I may be asked to leave the community by the Residence Hall Director. I realize that living in the Pet Wing is a privilege that brings with it responsibilities that I must meet.
4. I understand that while I am allowed to have a pet on the floor, it must first be cleared through my Residence Hall Director. I understand that if, at any time, my roommate or neighbors become bothered by my pet, I may be asked to remove it from campus at the request of the Review Board or my Residence Hall Director. I will not take my pet to other areas of the residence hall and will keep my pet supervised at all times, especially in the lounge. I agree to provide all required veterinary records for my pet (rabies shots, feline leukemia, spayed/neutered, etc.) and understand that only animals that have been spayed/neutered (if this procedure is available for my animal) may be permitted to live in the Pet Wing. I understand it is my responsibility to maintain the required vaccination status in good standing at all times. Failure to do so will result in immediate removal of my pet until vaccinations are updated. **A complete list of required records is listed on the back page of the contract.**
5. I understand that harboring animals that do not belong to me is not permitted and may result in disciplinary action. This includes allowing a friend or faculty member's animal to live in my room. Registering pets owned by another resident is forbidden. Any such requests must receive prior approval from the Residence Hall Director.
6. I understand that under no circumstances are snakes, birds, spiders (generally reptiles and amphibians) allowed in the Pet Wing Community, not even for a brief visit. Absolutely no animals that require a heat lamp will be accepted. I accept that harboring these animals will result in disciplinary action.
7. I understand that the Pet Wing is a desirable lifestyle option for many students that attend SUNY Canton, and that the residential floors that comprise the pet wing community may accommodate no more than 48 residents during any given semester. As such, I understand that any requests for a single room may be denied by my Residence Hall Director based on student demand for the Pet Wing.
8. I understand that having a pet on campus is a special privilege that may be revoked by the Review Board or the Residence Hall Director. I also understand that all decisions regarding the status of "at risk" animals are final and there is no appeals process for such judgements.

The following guidelines apply to residents who own cats. As a cat owner in the Pet Wing Community, I agree to the following rules and responsibilities regarding my pet:

1. I understand that I may only bring one cat to reside with me on the floor. I accept that harboring any additional animals will result in disciplinary action and I may be asked to send all of my pets home.
2. I understand that I must sift my litter box **at least** twice every day, preferably once in the morning and once again in the evening. In addition to this, I agree to completely clean/change my litter box **at least** once every week. If I choose to use unscented cat litter, I agree to apply an additive (such as baking soda) to alleviate the odor of my pet.
3. I understand that I am responsible for cleaning/changing my own litter box regardless of which animal uses it. In addition, I understand that if my pet defecates in an improper place (any area outside of a litter box, such as a carpet, bed, hallway, etc.), I agree to clean it up immediately and understand that I will be held responsible for any property damage that may have occurred due to my pet. This may include the cost of cleaning supplies to remove any lingering smells or stains. I also understand that all monetary discrepancies regarding reimbursement, should there be a disagreement regarding the issue, shall be resolved by the Residence Hall Director.
4. I understand that all pet-related materials and waste **must be properly bagged and disposed** of in the garbage bins located in the main lounge. I accept that improper disposal of litter and pet-related waste in the bathroom stall receptacles or the lounge trash cans may result in disciplinary action.

Vaccines pets must have:

Cats: **Rabies** (depends on the brand of vaccine – initial shot good for one year with boosters being good for 1-3 years depending on the brand)

Feline Leukemia (yearly after initial series)

Distemper Series (need 2 vaccinations as a kitten and then not set protocol for boosters as they get older. Initial series may be good for many years.)

NOTE: *Kittens must be at least 12 weeks of age in order to receive their initial Feline Leukemia shots. Therefore, kittens younger than 12 weeks old are not permitted to enter the Pet Wing for any duration of time without permission of the Residence Hall Director.*

Ferrets: **Rabies** (first vaccination good for one year and boosters typically good for 3 years, depending on the vaccine used)

Ferret/Canine Distemper Series (need 3 vaccinations at a few months old and then yearly boosters)

Hamsters, Mice, Guinea Pigs: **No approved vaccines available**

The most important thing that you can do to keep from getting sick is to wash your hands. By frequently washing your hands, you wash way germs that you have picked up from other people, or from contaminated surfaces, or from animals and animal waste. Hand washing is the #1 defense against infections.

As a resident of the Pet Wing I agree to the above terms, and understand that a violation of the agreement may result in my dismissal from the Pet Wing.
